EDUCATION

University of Chicago Chicago, IL
M.A. in the Social Sciences, Quantitative Methods (MAPSS-QMSA) Expected Jun 2027
- Relevant Coursework: Probability and Statistical Inference; Data Science for Marketing Decision Making with AI

Bates College Lewiston, ME
B.A. in Economics; Minors in Mathematics, Digital and Computational Studies May 2026
- GPA: 3.95/4.0 (Major: 3.96/4.0) | Honors: Cum Laude, Phi Beta Kappa
- Study Abroad: London School of Economics, Sep 2024 – Jun 2025
- Relevant Coursework: Advanced Econometrics; Linear Algebra; Multivariable Calculus; Data Structures and Algorithms; Computing for Insight (Python/R); Data Science for Social Scientists (LSE); Databases (LSE)

RESEARCH EXPERIENCE

Bates College Lewiston, ME
Senior Thesis: Reddit Sentiment and AI Product Announcements Sep 2025 – Dec 2025
- Tested whether retail-investor sentiment on Reddit predicts short-term abnormal stock returns around AI product announcements using event studies, panel fixed effects, and Granger causality
- Built a daily firm-level sentiment signal from ~15,000 Reddit posts and comments collected via API, scored with VADER and TextBlob; computed abnormal returns against a NASDAQ benchmark
- Found that sentiment Granger-causes next-day abnormal returns but not the reverse: under a two-lag specification, a one-unit sentiment increase predicts ~2.2 pp higher abnormal returns the following day
- Estimated VAR models and impulse response functions showing sentiment shocks dissipate within ~3 days; presented at the Mount David Summit (selected by the Dean of the Faculty) and the Senior Thesis Poster Session

Vassar College Poughkeepsie, NY
Research Assistant, Department of Economics Jun 2025 – Feb 2026
- Led collection of a 15-million-observation GoFundMe dataset via recursive API calls and URL-based HTML scraping of campaign-level information
- Applied TF-IDF and bag-of-words text features with LASSO regression to categorize crowdfunding campaigns
- Conducted exploratory data analysis with Professor Kyle Coombs and compiled state-level law data for analysis

Bates College Lewiston, ME
Research Assistant, Department of Economics Jan 2025 – Jun 2026
- Supported Professor Sandra Goff on an NSF-funded experimental economics project on labor task substitution and perceptions of AI-assisted cognitive work
- Built experimental instruments in oTree and Qualtrics with JavaScript for custom logic, randomization, and task flows
- Contributed to experimental design and data collection workflows; prepared datasets for statistical analysis

TEACHING EXPERIENCE

Bates College Lewiston, ME
Teaching Assistant, Econometrics Jan 2026 – Apr 2026
- Held weekly three-hour sessions for 60 students; helped design lab assignments and graded labs and exams in Stata
- Previously: Teaching Assistant, Statistics (Fall 2023); Tutor, Intermediate Microeconomic Theory (Winter 2024)

LEADERSHIP

Phoenix Quant Collective, University of Chicago Chicago, IL
Professional Outreach Chair, Executive Board Oct 2026 – Present
- Source and announce opportunities, including winternships, mentorship programs, and trading competitions
- Contact quantitative researchers and firms to coordinate technical talks, workshops, and firm visits

SKILLS

Programming: Python, R, SQL, Stata, Git/GitHub, Jupyter, VS Code
Statistics & ML: pandas, NumPy, StatsModels, scikit-learn, tidyverse; panel fixed effects, event studies, VAR/IRF, Granger causality, LASSO, NLP (TF-IDF, VADER, TextBlob)
Data & Visualization: SQLite, MySQL, REST APIs, web scraping, JSON; Matplotlib, Plotly
